The Free Phone Project

Cost

Free

Self-Install Guide

1. Go to https://voice.google.com and log in to your Gmail account.
2. Pick a new phone number or port your existing number, but don't choose GV "Lite".
3. Enable "Forward Calls to: Google Chat" in your Google Voice Settings on the site.
4. Set up your Google account on your Android or iOS device.
5. Install Talkatone and enjoy free calling and texting!

Limitations: Requires WiFi or data connection. MMS texts only work on Sprint.

Pro Tip: Use a tablet SIM card in a phone for a no-contract data plan and save $$
